

SEFRALIT

Mosquito Control

Sefralit is designed specifically for targeting mosquito larvae. Harnessing the power of *Bacillus sphaericus* (Bs), a unique and potent strain, Sefralit provides unparalleled advantages over traditional chemical insecticides.

Sefralit AS This liquid form is easy to apply with various equipment types and quick to disperse, perfect for targeted and efficient mosquito larvae control.

Sefralit WDG Providing enhanced stability and shelf life, the water dispersible granules offer a convenient option for applications in various environments.

Advantages

- **Environmentally Friendly:** Sefralit stands out as an environmentally friendly solution, offering mosquito control without harmful effects on non-target organisms or the broader ecosystem.
- **Resilience in Organic Environments:** Sefralit excels in controlling mosquito larvae in environments rich in organic matter, such as catch basins, animal waste lagoons, and stagnant ponds, providing an effective and sustainable solution in diverse settings.
- **Flexibility in Application:** The product is available in both liquid (AS) and water dispersible granules (WDG) formulations, offering flexibility in application methods to suit different preferences and needs.
- **Ease of Application:** The liquid formulation ensures easy application, while the granular form provides stability and convenience, allowing for straightforward and efficient use.

Sefralit offers extended control of all *Culex* species and has been found to be effective against the following species:

Aedes - *Aedes melanimon*, *Aedes nigromaculis*, *Aedes sollicitans*, *Aedes stimulans*,
Aedes triseriatus, *Aedes vexans*

Anopheles - *Anopheles darlingi*, *Anopheles gambiae*, *Anopheles quadrimaculatus*
Coquillettidia perturbans

Psorophora - *Psorophora columbiae*, *Psorophora ferox*

Choose Sefralit for Effective, Safe, and Eco-Friendly Mosquito Control:

Sefralit is your trusted partner in combating mosquito infestations, ensuring healthier and safer environments for communities. With its proven efficacy, selective action, and eco-conscious approach, Sefralit is the ultimate solution for responsible mosquito control.
