

# BIO T PLUS™

**Bio T Plus™** is a bioinsecticide to control Lepidoptera larvae in field crops, orchards, and forests.

The product is based on *Bacillus thuringiensis* subsp. *kurstaki*.

The liquid formulation of Bio T Plus is a concentrate that can be applied by ground or aerial spray.

**Bio T Plus™ WDG** is a water dispersible granule formulation that sprays easily through many equipment types after dissolving in water.

**Bio T Plus™** contains delta endotoxin crystals and viable spores of *Bacillus thuringiensis* subsp. *kurstaki*, and are used to control pests in grapes, melons, beans, tomatoes, cabbage, citrus, apricots, pears, apples, plums, oak forests, cotton, tobacco, banana, nursery plants, mushrooms, and nuts.

## Advantages

- ▣ Selective biological insecticide
- ▣ Environmentally friendly - not toxic to non-target insects
- ▣ Liquid concentrate - 16,000 IU/mg
- ▣ Water dispersible granules - 32,000 IU/mg
- ▣ Long shelf life - 2 years (stored below 28°C)
- ▣ UV protection - Extended field activity
- ▣ Improved adherence to vegetation foliage
- ▣ Feeding stimulant - Improves efficacy

**BIO T PLUS™ is a highly efficient selective bioinsecticide against Lepidoptera:**

*Helicoverpa (Heliothis) armigera*

*Trichoplusia gama*

*Lobesia Botrana*

*Cryptoblabes gnidiella*

*Thaumetopoea pityocampa*

*Boarmia selenaria*

*Batrachedra amydraula*

*Deudorix livia*

*Cydia Pomonella*

*Thaumetopoea wilkinsoni*

*Lymantria dispar*

*Carpocapsa pomonella*

*Anarsia lineatella*

*Apomyelois ceratoniae*

*Thaumatotibia leucotreta*
