

# BIO T PLUS

## Bio-Pesticide

**Bio T Plus** is a groundbreaking bioinsecticide designed for the effective control of Lepidoptera larvae in field crops, orchards, and forests. Powered by *Bacillus thuringiensis* subsp. *kurstaki*.

**Bio T Plus** features delta endotoxin crystals and viable spores of *Bacillus thuringiensis* subsp. *kurstaki*, making it a trusted solution for a wide range of crops, including avocados, tomatoes, vineyards, pine forests, persimmon, apples, citrus, pomegranates, strawberries, bananas, tobacco, and almonds.

**Bio T Plus** is available in both liquid and water dispersible granule forms, offering flexibility in application methods.

## Advantages

- **Precision Control:** As a selective biological insecticide, Bio T Plus is environmentally friendly, ensuring the protection of beneficial insects and the balance of ecosystems.
- **Long Shelf Life:** Bio T Plus boasts a two-year shelf life when stored below 28°C, providing lasting efficacy and reliability.
- **UV Protection:** Its formulation includes UV protection, extending its field activity and performance under various weather conditions.
- **Enhanced Adherence:** Bio T Plus features improved adherence to vegetation foliage, ensuring thorough coverage and optimal pest control.
- **Feeding Stimulant:** The product acts as a feeding stimulant, enhancing its efficacy in controlling Lepidoptera larvae.

**BIO T PLUS is a highly efficient selective bioinsecticide against Lepidoptera:**

*Helicoverpa (Heliothis) armigera*

*Spodoptera spp.*

*Thaumetopoea wilkinsoni*

*Lobesia Botrana*

*Cryptoblabes gnidiella*

*Thaumetopoea pityocampa*

*Boarmia selenaria*

*Batrachedra amydraula*

*Deudorix livia*

*Cydia Pomonella*

*Grapholita molesta*

*Schizura concinna*

*Lymantria dispar*

*Carpocapsa pomonella*

*Anarsia lineatella*

*Apomyelois ceratoniae*

*Thaumatotibia leucotreta*
